Phase 2: Viral Web + Social Launch

Phase 3: Activate Auto-Sniper & Dummy Wallet Buys

Phase 4: Listing on DEXTools, DexScreener, Coinsniper

Phase 5: First Tier-2 CEX Listing

HAPPIEST TOKEN WHITEPAPER

Developer Wallet Commitment

To ensure long-term project stability and build public trust, the developer wallet (10% of total supply) is locked for a full 12-month period.

This lock ensures that no tokens from the developer allocation can be accessed or sold during this period, preventing early dumps and demonstrating serious commitment to the community.

Even though the lock is not enforced by smart contract, the HAPPIEST team commits to transparency and public accountability throughout the lock duration.

Compliance & Transparency

This whitepaper is for promotional and informational purposes only. HAPPIEST adheres to fair-launch standards, with LP lock, SAFU audit reports, and a transparent long-term roadmap.
